25X1 5. [] Talked with Robert E. Dunne, Counsel, Senate Permanent Investigations Subcommittee, who advised that material relating to identity documents for the AID/South Vietnam program is still being received. Mr. Dunne noted that in this instance the Committee is not acting in an investigative capacity, but is attempting to be of assistance to GPO and AID in getting the proper persons together for a quick informal look-see at the proposed documents. See Journal of 21 November 1967.

25X1 6. [] Delivered to Jim Kendall, Senate Preparedness Investigating Subcommittee staff, some statistics on the Soviet ICBM program which he had requested earlier. He inquired if there were any other graphs or charts used in previous briefings which would be helpful.

25X1 7. [] Discussed with Mr. Robert Michaels, House Appropriations Committee staff, the Agency's best guess as to the probable state of technology of the initial ChiCom ICBM when it becomes operational. He needed no further details.

25X1 8. [] Talked with William Darden, Senate Armed Services Committee staff, who advised that Chairman Russell left town on Saturday. He also indicated he had sat in for the Senator on the Rusk Task Force last week. Apparently no decisions were reached and Rusk indicated they would undoubtedly have to have another meeting when more of the congressional members were present. Mr. Darden stated that the NEW YORK TIMES article on this subject was generally accurate.

25X1 9. [] Messrs. [] and Warner met with Senator Milton Young for approximately an hour and a half touching on various current intelligence topics. The Senator was most appreciative of our taking the time to bring him up to date.

25X1
